EDUCATION

BS Software Engineering

COMSATS University Islamabad,
Lahore Campus
CGPA: 3.34 / 4.0
2023 – Present (Final Year)

TECHNICAL SKILLS

Languages

Python, JavaScript, Java, Dart, C++, SQL

Web

React.js, Next.js, Node.js, Express,
HTML/CSS, REST APIs

Mobile

Flutter, React Native

AI / ML

TensorFlow, scikit-learn, OpenCV,
LangChain, OpenAI API

Databases

MySQL, MongoDB, Firebase

Cloud

AWS (S3, EC2), Firebase Hosting

Tools

Git, Docker, Figma, Postman, VS Code

CERTIFICATIONS

AWS Cloud Computing

Amazon Web Services, 2024

STRENGTHS

- Agile / Scrum Methodology
- Cross-functional Teamwork
- Problem Solving
- Fast Learner
- Technical Documentation
- Communication
- Open to Relocation

PROFESSIONAL SUMMARY

Results-driven Software Engineer with hands-on expertise in full-stack web development, cross-platform mobile applications, and AI/ML integration. Proven track record delivering production-grade applications using React.js, Node.js, Flutter, and Python. Experienced in RESTful APIs, cloud deployment, and agile workflows. Seeking an internship or junior role to contribute technical depth to real-world software projects.

KEY PROJECTS

AI Resume Builder & Analyzer

React.js · Node.js · Python · OpenAI API · MongoDB

- Built a full-stack platform generating ATS-optimised resumes via AI based on user input and job descriptions.
- Integrated an AI scoring engine that benchmarks resumes against job postings and gives actionable improvement suggestions.
- Developed RESTful Node.js backend with MongoDB for auth, user data persistence, and resume version history.
- Implemented PDF export and responsive React.js UI with real-time AI feedback, reducing iteration time ~70%.

AI Content Detection App

Python · Flask · React.js · Machine Learning · NLP

- Developed a web app classifying AI-generated vs human-written text using fine-tuned NLP models with high accuracy.
- Deployed Flask API with real-time inference and confidence score visualisation; results delivered in under 2 seconds.
- Built an intuitive React.js frontend for instant paste-and-analyse experience.

Cricket Update Website

React.js · Node.js · Cricket API · MongoDB

- Built a real-time cricket scores portal with live scorecards, player stats, and series standings from live API feeds.
- Implemented Node.js server-side caching reducing API calls ~60% and ensuring fast page load times.
- Added team-following feature with match update notifications for personalised user experience.

EXPERIENCE & ACTIVITIES

Software Developer — Web & AI Projects

Independent / COMSATS Lahore | Jan 2023 – Present

- Designed and delivered 3 production-ready full-stack applications as sole developer across frontend, backend, and deployment.
- Applied agile methodology with iterative sprints, code reviews, and GitHub-based version control throughout.

Core Member — Google Developer Student Club (GDSC)

COMSATS University Islamabad, Lahore Campus | 2022 – Present

- Organised 5+ technical workshops on web development and AI for 200+ students across campus.
- Led a team of 4 to build and launch an open-source campus event management web application.
